Projects

Great Date (React, Bootstrap, JavaScript, Express, Sequelize, PostgreSQL)

Full-Stack application that randomly selects activities for dates from user submitted content

- Used Github, feature branch Git workflow, and Agile to collaborate with team members
- Utilized Amazon S3 Bucket cloud storage to store, retrieve, and render user-submitted date activities with images
- Featured Google and Facebook log-in API's, sign-up with user-authentication

WAYŌ (HTML, CSS, JavaScript, jQuery)

Collaborated with UX/UI designer to bring a mock upscale sushi restaurant website to life

- Integrated Google Maps API to pinpoint restaurant location
- Utilized jQuery and CSS to create custom FAQ section and photo slideshow from wireframes

Wizzair (Vue.js, Rails API, Bootstrap)

Fully-responsive, almost pixel-perfect clone of Wizzair.com

- Created a Rails API that transmitted live data to Vue.js component GET requests
- Effectively used media queries, max-widths, and flexbox to produce a mobile-friendly, visually appealing views on all screen widths and resolutions

Skills

JavaScript	**React**	**jQuery**	**Node**	**Express**	**SQL**
Ruby on Rails	**HTML**	**CSS**	**Bootstrap**	**PostgreSQL**	**Git**

Experience

Scientist.com   **February 2018 - April 2018**
Full-Stack Software Developer Intern
